# LEARNING to the MAX

an educator's guide to IMAX films

Goodrich Quality Theaters offers "Learning to the MAX," a field trip program offered for educators as a teaching tool to enhance existing curriculum with unique and exciting opportunities. Organizing a field trip is easy and economical.

We are in the process of expanding the IMAX Educator film library. We have digital IMAX Projection systems that give us an advantage to economically show all large format releases, and offer Traditional forty minute educational IMAX films. We hope to add more Traditional IMAX films to our library as soon as they are converted digitally.

Educators' Resource Guides can be viewed on our website for each Traditional IMAX movie. The guides include relevant discussion topics and content that can be adapted to your curriculum written for elementary through high school students.

IMAX®  
THE ULTIMATE  
MOVIE EXPERIENCE

## Education that Entertains

Full of hope, crushing disappointment, dazzling ingenuity, bravery, and triumph, in **Hubble 3D**, the seventh awe-inspiring film from the award-winning IMAX® Space Team. Journey through distant galaxies to explore the grandeur and mysteries of our celestial surroundings, and accompany space-walking astronauts as they attempt the most difficult and important tasks in NASA's history. An inspirational look into the Hubble Space Telescope's legacy and a highlight of its profound impact on the way we view the universe and ourselves.

**Under the Sea 3D** transports moviegoers to some of the most exotic and isolated undersea locations on Earth, including Southern Australia, New Guinea and others in the Indo-Pacific region, allowing them to experience face-to-face encounters with some of the most mysterious and stunning creatures of sea. A uniquely inspirational and entertaining way to explore the beauty and natural wonder of the oceans. The images will literally leap off the screen and float around the theatre, putting you in the movie.

**Space Station 3D** is the story of this unique partnership of 16 nations building a laboratory in outer space -- a permanent facility for the study of the effects of long-duration exposure to zero gravity and the necessary first step towards the global cooperative effort needed if man is to someday set foot on Mars. It is a story of challenges, setbacks and triumphs...and ultimately, the shared international victory of men and women whose dreams exceed the limits of life on this Earth.

**Born to be Wild 3D** is an inspired story of love, dedication and the remarkable bond between humans and animals. This film documents orphaned orangutans and elephants and the extraordinary people who rescue and raise them-saving endangered species one life at a time. A heart-warming adventure transporting moviegoers into the lush rainforests of Borneo with world-renowned primatologist Dr. Birute Galdikas, and across the rugged Kenyan savannah with celebrated elephant authority Dame Daphne Sheldrick, as they and their team rescue, rehabilitate and return these incredible animals back to the wild. Narrated by Academy-Award winner Morgan Freeman.

It takes a drop of water nearly 400 years to travel from the headwaters of Lake Superior to the edge of Lake Ontario. Along the way, the water passes by towering cliffs dotted with early Native American pictographs, caribou and moose grazing on the shores, over giant prehistoric sturgeon lurking among thousands of shipwrecks and past nearly 40 million people who live along the more than 10,000 miles of coastline. It is a dramatic journey through some of the most spectacular scenery in the world. Now, you can witness the **Mysteries of the Great Lakes** on the only screen large enough to reveal them, in IMAX!

Popcorn, Water and  
Oat Bar - **\$3.50**

*Prices are subject to change.*

# A Rewarding Field Trip

## Group Reservations

Please call 888-447-1361 or email [groupsales@gqti.com](mailto:groupsales@gqti.com) to schedule your field trip.

We accept cash, check, VISA, Master Card, American Express or Discover. Payment must be received no later than day of show. Bring your tax exempt number if you are tax exempt.

# General Information

## Arrival

Please arrive 30 minutes prior to the movie's start time. This will ensure enough time for taking care of the tickets, selecting concession items, 3D glasses and last minute stops to the restroom.

If coming by bus, keep the kids on the bus and send in a representative to check in at the manager's station. They will then guide you as to where to bring the students in to get their concessions, 3D glasses, and what auditorium you will be in. Please have your group stay together so we can easily seat everyone efficiently.

## 3D IMAX

Some features are presented in 3D format, therefore we will hand out 3D glasses to each person. At the end of the movie, please return all 3D glasses upon exiting the theater.

## Refund

We understand that there may be some circumstances where you may have to cancel a field trip. We will make every attempt we can to re-schedule the showing. If you have to cancel, please call the group sales coordinator before the start time of the show. We cannot give a refund if your film has started.

# IMAX Projector

IMAX'S revolutionary digital projection delivers crystal-clear images with a level of quality that is far above ordinary projection standards, in both IMAX and IMAX 3D.

## IMAX Sound

The six-channel, multi-way digital IMAX speaker system with sub-bass utilizes 44 speakers behind the screen and at the rear of the theater to deliver unsurpassed sound in depth and clarity.

16 amplifiers generate more than 12,000 watts of power, not volume, to provide the audience with life-like sound. From a small drop of rain to an enormous clap of thunder, you'll hear every shade and subtlety, regardless of where you are sitting.

## IMAX Screen

The IMAX screen spans wall to wall and floor to ceiling, and is perforated with thousands of tiny holes to allow sound to pass through. The eight story high screen is coated with a proprietary high-grain silver paint to maximize light polarization and brightness. Because these screens fill your peripheral vision, you feel like you're right in the action.
